

FRESH BY LUCCI

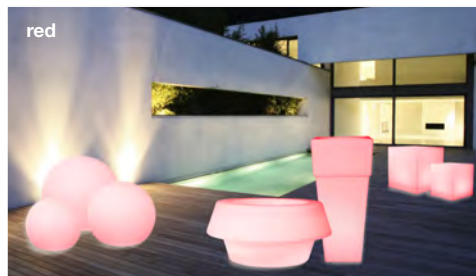

LUCCI

FRESH BY LUCCI

The new and exciting Fresh product range features a variety of illuminated furniture perfect for outdoor and indoor entertaining or for that special statement piece in your garden. The Fresh range is made from UV stabilised acrylic, and can run safely on 12 volt power supply with a ES lamp holder or LED (light emitting diodes).

The fitting utilises a low energy, low voltage CFL (compact fluorescent lamp). There is also the option of colour changing LED which can be set on one colour or the option of colour changing. The colour changing LED can run on both power supply or battery, which is rechargeable and has an 8 hour life, eliminating any cables and trip hazards, making it ideal for parties and outdoor entertaining.

THE FRESH RANGE

Constructed from UV stabilized acrylic material, with an IP44 rating. All products come with transformer, cables and rechargeable batteries.
